CURBING ESTIMATE

CURBING: WE OFFER FREE ESTIMATES. WE CAN MEET WITH YOU AT YOUR HOME TO REVIEW YOUR PROPOSED CURBING PROJECT.

1. We will work with you to design the best possible layout. We will paint & measure your area and give you a written estimate prior to installation. *Estimates are valid for 30 days.* Please keep sprinklers and water off the area to be curbed 2 days prior to installation. (Please pick up after your pets before we arrive).
2. Landscape curbing is best installed prior to the installation of irrigation lines, but not absolutely necessary. Our landscape contractor customers always have us come in prior to trenching so that sprinkler heads can be installed right up against the wall of the curbing.
3. Please provide access to your job site and keep pets indoors for the duration of the installation.
4. Be sure to plainly mark all sprinkler heads and lines, telephone wires, cable TV, or other buried items. Flatiron Curbing is not responsible for any damage by our crew or equipment to any buried items.
5. Your curbing is installed using the highest quality materials and equipment. We add ½ inch polypropylene and pozzolith for added strength, stability. We add efflorid to help retain the color.
6. The color is added into the concrete mix and is measured precisely for a consistent color throughout the project.
7. We make every effort to keep and leave the job site clean and neat. During the installation of the curbing some excess concrete may be present around the areas installed and is very difficult to remove while the concrete is still wet. After your 24-hr curing period it can be picked up in small pieces and thrown away or mixed with the topsoil. We are sorry for this inconvenience but we do not bid a return trip in the price of the curbing.
8. When we complete your installation of your curbing we will measure again with a measuring wheel to get an accurate footage count. The measuring is done outside the curb line for safety.
9. Payment is due upon completion of the job.
10. See the guidelines and warranty section for taking care of your curbing.
